

I am a financial supporter of AIR 1 and listen to it every day. It is the only station that provides myself and my family with modern Christian music and news from a Christian perspective. It also supplies me with weather and traffic information. Please consider how expanding Low Power FM (LPFM) will have a negative effect on AIR 1's service. AIR 1 recently held their Fall pledge drive and received 98% of their needed funding to stay on the air. Because of this and the calls that I have heard over the radio in it's support, I know that the public does not want to lose AIR 1. Thank you.
